[redacted] A/B, 3, 2/8

TO THE FILES

On 24 March 1954, Wednesday, SI and H Experimentation and research was carried on in Building 13 with the following subjects present: [redacted] and [redacted] were in charge of this session.

The first part of the evening consisted of the application of the induction of hypnosis to all subjects present conditioning them and continuing for approximately 40 minutes with varying degrees of success. Immediately following, questions were invited from the subjects present as to their level of interest in this work and any particular questions that might have to be answered or any criticism that could be offered. After satisfying their interests and answering all questions the H work continued.

A

The phenomena of catalepsy was produced using [redacted] as the subject. After placing [redacted] a cataleptic state of hypnosis, [redacted] with the help of [redacted] placed [redacted] rigid body between two chairs, on one chair was her head and the other chair supported her feet. Pressure was applied to her abdomen to simulate weight. [redacted] remained completely rigied throughout the test and had amnesia for the entire proceedings. [redacted] expressed belief that a person could normally perform a catalepsy but when [redacted] tried to do the same thing under normal conditions but slumped to the floor.

[redacted] was then put under hypnosis and regressed to age 10 in order to draw her interpretation of a house and ~~et her~~ an interpretation of a house at her present age level. [redacted] gave an opinion on the drawings that [redacted] be trying to hide some unpleasant event in the past life of her family and felt we should discuss it no further.
